

SUNIL KULALI

Data Analyst | Machine Learning Engineer

sunilkulali638@gmail.com | +91-7619294459 | Bengaluru, Karnataka | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven **Data Analyst and Machine Learning Engineer** with hands-on internship experience in end-to-end **data analysis, SQL development, BI dashboard development, KPI reporting**, and ML model building. Proficient in **Python, SQL, Power BI, Tableau, Scikit-learn, TensorFlow, and PyTorch**. Experienced with LLMs, Generative AI, NLP, ETL pipelines, and **stakeholder reporting** across retail, banking, and customer analytics domains. Strong communicator with proven ability to transform complex datasets into actionable insights that drive **data-driven decision-making**. Adept at managing competing priorities, collaborating cross-functionally, and delivering results under tight deadlines.

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL, R (Basic)

ML & AI: Regression, Classification, NLP, Deep Learning (TensorFlow, PyTorch), LLMs, Prompt Engineering, RAG, Generative AI, Anomaly Detection, Forecasting, Feature Engineering, Hyperparameter Tuning

Databases: MySQL, PostgreSQL, SQL Server, SQLite, BigQuery (Basic) — CTEs, Window Functions, Stored Procedures, Views, Query Optimization

BI & Visualization: Power BI (DAX, Power Query, Data Modeling), Tableau, Plotly, Seaborn, Streamlit

Frameworks & Tools: FastAPI, Flask, REST APIs, Hugging Face Transformers, LangChain, MLflow (Basic), Docker (Basic), Git, GitHub, Google Cloud (Basic), AWS (Basic)

Business Analysis: Requirements Gathering, KPI Tracking, EDA, ETL Pipelines, Data Cleaning, Root Cause Analysis, Stakeholder Reporting, Change Management Support, Process Documentation

Productivity & Reporting: Microsoft Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Automated Reporting), PowerPoint, Word, Outlook, Teams, SharePoint

INTERNSHIP EXPERIENCE

Data Analyst Intern | *IT Vedant, Bengaluru*

June 2024 – April 2025

- Analysed **10,000+ record datasets** using Python (Pandas, NumPy) and SQL to extract actionable business insights, enabling **KPI-driven stakeholder reporting** and executive decision-making.
- Designed and maintained **Power BI dashboards (DAX, Power Query)** to track KPIs across multiple business units, supporting data-driven management decisions and operational reviews.
- Automated reporting workflows using Power BI and Power Query, improving **reporting efficiency by 40%** and significantly reducing manual effort — directly improving data accuracy and integrity.
- Maintained **process documentation, SOP alignment**, and data validation workflows to ensure stable, accurate data pipelines for stakeholder consumption.

Machine Learning Intern | *CODE-B Solutions Pvt. Ltd., Mumbai*

March 2025 – May 2025

- Applied supervised ML models (**Random Forest, XGBoost, Logistic Regression**) to real-world business datasets, improving prediction accuracy through advanced **feature engineering and hyperparameter tuning**.
- Reduced model training errors by **~15%** via systematic outlier treatment and preprocessing pipelines using Python and SQL, ensuring high **data quality and integrity**.
- Developed complex **SQL queries, views, and stored procedures** to generate business insights on sales, performance trends, and customer behavior with full documentation.

PROJECTS

AI-Powered Data Intelligence & BI Automation Platform — Tech Stack: *Python, LangChain, LLMs, Generative AI, Power BI, FastAPI, PostgreSQL, RAG, Streamlit*

- Built an end-to-end **AI-powered analytics platform** integrating LLMs and RAG to enable natural-language querying of structured business data, reducing **ad hoc reporting time by 60%**.
- Implemented a LangChain-based agent pipeline that auto-generates SQL queries from user prompts, executes them on a **PostgreSQL backend**, and renders results in an interactive Streamlit dashboard.
- Designed **automated BI report generation workflows** using Power BI (DAX, Power Query) and FastAPI REST endpoints, enabling real-time KPI tracking across sales, revenue, and customer metrics.
- Integrated **Generative AI summarization** to auto-produce executive-ready insight narratives from raw query outputs, accelerating data-driven decision-making for stakeholders.

Real-Time Retail Sales BI Dashboard — Tech Stack: *Python, Google Sheets API, Google Apps Script, Power BI, REST API, DAX*

- Built a **real-time retail BI system** integrating a web data-entry portal, serverless REST API, Google Sheets database, and a self-refreshing Power BI dashboard for live sales monitoring.
- Designed **DAX measures and data models** in Power BI for KPI tracking across revenue, product performance, and sales trends; incorporated auto-bill generation and duplicate detection logic.

Loan Approval Prediction & Credit Risk Analysis — Live Deployed ML Web App

Tech Stack: *Python, Scikit-learn, Random Forest, XGBoost, Gradient Boosting, Logistic Regression, Decision Tree, Pandas, NumPy, Streamlit, Joblib*

- Built an industry-level end-to-end ML pipeline on **45,000 real loan records** achieving **90.2% accuracy and 0.9665 ROC-AUC** with Random Forest as the best model.
- Engineered 5 domain-driven features (debt-to-income ratio, income-per-age, loan-to-credit-history ratio, high-loan flag, high-income flag) to improve model signal.
- Trained and compared 5 classification models (Logistic Regression, Decision Tree, Random Forest, Gradient Boosting, XGBoost) with hyperparameter tuning via RandomizedSearchCV and GridSearchCV.

Customer Churn Prediction & Retention Analysis — Tech Stack: *Python, Scikit-learn, SQL, Power BI, EDA*

- Identified key **churn drivers** through SQL segmentation and Python EDA; built ML models to generate churn probability scores and segment at-risk customers.
- Visualized insights via **interactive Power BI dashboards**, enabling marketing teams to design targeted retention strategies and measurable interventions.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

2020 – 2024

Visvesvaraya Technological University | CGPA: 7.82 / 10

CERTIFICATIONS

- **Data Analytics & Visualization Job Simulation** – Accenture
 - **Machine Learning with Python** – IBM
 - **Data Analysis with Python** – IBM
 - **Python for Data Science** – IBM
 - **Databases & SQL for Data Science with Python** – IBM
-

KEY COMPETENCIES

Data Analysis • Machine Learning • Deep Learning • SQL Development • Power BI • Tableau • ETL Pipelines • Feature Engineering • KPI Tracking • EDA • Stakeholder Reporting • Root Cause Analysis • Statistical Analysis • Business Analysis • Data Visualization • Anomaly Detection • Change Management • Process Documentation • Cross-functional Collaboration • Executive Reporting
